

How do you setup your DM11P using PPPoA with routers.

For PPPoA which you will not be able to use modem mode-RFC Bridge (routers do not support PPPoA on most of them). you would simply setup LAN IP range different from your primary router you will be using. DM as 192.168.20.x and primary router as 192.168.0.x

You would simply adjust the LAN IP so that both are different and when primary router is connected to DM unit, I think we all know that WAN side of primary router will get 192.168.20.x IP. automatically think this will be NAT over NAT but using this method with FVX and establishing VPN and remote management of router also worked. This method was provided by netgear support,

ProSafe VPN Summary

All other configuration details should follow the ProSafe Owner's Manual or the ProSafe VPN Client Owner's Manual.

Additional Resources

Here are some additional resources you find useful.

Netgear

The network products manufacturer (<http://www.netgear.com/>)has some tech support notes and White Papers on their VPN/Firewall devices and some tips for achieving basic interoperability. They also host a user support forum (<http://forum1.netgear.com/>)ontheir various products where users can post questions and get answers from their peers.

SafeNet

SafeNet (<http://www.safenet-inc.com/>)is one of the largest OEM providers of VPN client software to VPN/firewall manufacturers. SafeNet has a tech support area (<http://support.safenet-inc.com/>)listing tech notes on their products with various VPN gateways including some individual interoperability examples. SafeNet is the OEM supplier of the Netgear ProSafe VPN Client software.

VPNC

The VPN Consortium (<http://www.vpnc.org/>). VPNC has various writings and White Papers on many manufacturers VPN devices and tips for achieving interoperability.

Practically Networked

Practically Networked (<http://www.practicallynetworked.com/>)has various writings on many manufacturers VPN devices and tips for achieving interoperability. They also have a section dedicated to VPN issues (http://www.practicallynetworked.com/support/VPN_help.htm).

HomeNetHelp

HomeNetHelp (<http://www.homenethelp.com/>)has various writings and White Papers on many manufacturers VPN devices and tips for achieving interoperability. They also host a user support forum on VPN Routers where users can post questions and get answers from their peers.

Disclaimer

Both ProSafe VPN/Firewall Routers and ProSafe VPN Client have several ways of setting up and configuring VPN tunnels. The settings may not be the best for your situation and some settings are situation specific.

This case study is published to guides you to setup your VPN Tunnel and VPNCASESTUDY.COM do not held any responsibility of any mistakes or errors.
